Genesis Electronics Recycling of Colorado

"Recycle the Present , Save the Future"

Our Mission

We reduce the environmental impact of obsolete electronic waste through recycling. We are a support resource for business, homes, schools, and cities to collect unwanted electronics.

We use a 100% no landfill policy. Electronics that can be refurbished, to extend their useful life are processed for resale.

Data Destruction

Certified Hard Drive Destruction

Genesis Electronics Recycling of Colorado provides Certified Hard Drive Destruction. Our company supports strict guidelines and destroys your data securely, we are required to adhere to the following laws; Health Insurance Portability and Accountability Act (HIPAA), Gramm - Leach - Bliley Act (GLBA), Fair and Accurate Credit Transactions Act (FACTA), Federal Information Security Management Act (FISMA), and the Sarbanes - Oxley Act. Companies can no longer simply throw away computer tape or hard drives because it is illegal to do so – not only because of the loss of critical data, but also because of environmental pollution. True data destruction is performed by using a degausser to destroy your hard drive. After this process is completed Genesis Electronics Recycling of Colorado will provide a Certificate of “Certified Hard Drive Destruction” for your records.
